

## Offshore Survival Solution - SRG International Introduce the Personal Sea Survival System (PS<sup>3</sup>)

SRG International has introduced the PS<sup>3</sup>, an innovative, practical, and effective life-saving device. The system incorporates a unique combination of a SOLAS life jacket with an auto-inflating single person life raft. Packaged into an ultra-slim, detachable, lightweight backpack, the PS<sup>3</sup> weighs in at less than 5kg.

Designed for low maintenance and fully approved to the latest SOLAS regulations, the automatic system is simple to operate with a front zip closure and separate side adjustment. The one-size-fits-all lifejacket is comfortable and unrestrictive while the single person raft is simple to board and quickly provides the survivor with thermal protection. With high-visibility colours, SOLAS reflective tape and an automatic light to aid detection, the PS<sup>3</sup> is a stable craft, even in extreme conditions.
